## WEBSITE DISCLOSURE

### 7. DATA SOURCES AND PROCESSING

BlackRock Portfolio Managers have access to research, data, tools, and analytics to integrate ESG insights into their investment process. Aladdin is the operating system that connects the data, people, and technology necessary to manage portfolios in real time, as well as the engine behind BlackRock's ESG analytics and reporting capabilities. BlackRock's Portfolio Managers use Aladdin to make investment decisions, monitor portfolios and to access material ESG insights that can inform the investment process to attain ESG characteristics of the Portfolio.

### 8. LIMITATIONS TO METHODOLOGIES AND DATA

There is a lack of standardised taxonomy of ESG evaluation methodology, as there are not yet commonly agreed principles and metrics for assessing the sustainable characteristics of investments. In evaluating a security based on sustainable characteristics, the Investment Manager is dependent upon information and data sources provided by internal research teams and complemented by external ESG rating providers, which may be incomplete, inaccurate or unavailable. Nevertheless, companies are regularly monitored and assessed.

### 9. DUE DILIGENCE

BlackRock designed sustainability indicators to be considered when Investment Advisers are considering to either exclude or identify companies that the Investment Adviser considers to be appropriate for investment on the basis that they are "in transition" and focused on meeting sustainability criteria over time.

### 10. ENGAGEMENT POLICIES

Maintain an ongoing dialogue with companies, for example in order to influence the investee company to improve its corporate governance practices, to ensure long-term value creation in the investee company, to promote disclosure standards or any other identified area of concern.

### 11. DESIGNATED REFERENCE BENCHMARK

No specific index has been designated as a benchmark to determine the alignment with the promoted environmental and/or social safeguards.
